

X SERIES

DESIGNED TO PROTECT

Tested for ingress to IP67 and impact resistance to IK08, the X series range of heavy duty enclosures are designed to protect.

X SERIES

Designed to protect

X6 series

Heavy duty knockout enclosure

With its metric sized knockouts for cable entry, the X6 enclosure is ideal for junction boxes in industrial settings with IoT applications. Clear lid and solid top options are available in both polycarbonate UL94-V0 or ABS with an IP66/IP67 ingress protection rating. This heavy duty enclosure safeguards your electronics in extreme environments.

X7 series

Heavy duty IP67 enclosure

Moulded corner protection of the X7 along with its IP66/IP67 rating and IK08 impact resistance, makes it perfect for those IoT and equipment applications where robust protection is essential. Available in either polycarbonate UL94-V0 or ABS, the electronics enclosure has either a solid lid or clear lid option.

X8 series

Heavy duty hinged lid enclosure

Whether you are looking for an indoor or outdoor enclosure, the X8 offers the solution. Ideally suited to DIN Rail mounted components, they are a flexible solution for IoT hubs and industrial automation panels. Clear lids are available in hinged and locking formats and available in either UL94-V0 polycarbonate or ABS.

Accessories include steel and plastic mounting plates, wall/surface mount brackets, vents, integral locks and dual door kits.

Why not make your enclosures stand out by utilising CamdenBoss' professional customisation service. We'll deliver your enclosure machined and digitally printed, ready to assemble STRAIGHT OUT OF THE BOX!
