

SmartMould

Custom moulded enclosures

We are specialists in custom plastic enclosure design and manufacturing, having created thousands of injection moulded and vacuum casted enclosures.

Our technical sales and design teams work directly with you to design and manufacture your custom enclosures. We can work from your ideas, sketches, 2D and 3D drawings or internal components.

Call our experienced technical sales team today and they can guide you through the custom enclosure process:

VAC-CAST

As well as injection moulding we also offer a vacuum casting (vac-cast) service. Vac-casting provides a fast, high quality, low volume, functional manufacturing option.

Vac-casting can be used for small production runs or as a stepping stone between SLA samples and volume manufacture.
